

Hello Bucks County Seniors,

We hope you are safe and in good health during our current pandemic phases.

We acknowledge that our Governor has turned on the **GREEN** light for our Commonwealth. Our understanding of being **GREEN** is to move forward cautiously. Our primary concern is keeping the health and safety of our community, membership, staff and volunteers.

Being **GREEN** does not mean the virus has gone away. Being **GREEN** just indicates that we as a populace are doing what is necessary to decrease the spread. The ripple effect hopefully is that our hospitals can handle the decreased demand on their vital services.

So, **GREEN** does not mean "normal".

While June 26th is the **GREEN** date, there are still guidelines to be followed. The CBSAC, being a location where the virus' main target group congregates, has guidelines that are a bit stricter and thorough.

Please be assured we are working on these guidelines. These include proper equipment, procedures, signage and personnel. Also, one of the most important parts of the process is the money to procure each of the above.

Thus, you now know we are working to move forward. Unfortunately we do not have any estimated date of when we will be properly prepared to actually open our doors.

We hope people will watch our website (cbseniors.net) and our Facebook page (Central Bucks Senior Center 700 Shady Retreat Rd). We hope to do a mailing to our active members when we have more solid information about an actual opening.

If you have the time and inclination, one of the biggest resources we will need is concerned, knowledgeable, healthy and energetic volunteers. Two primary chores needed to be filled are people to perform membership check-in, and guideline adherence monitors.

Thank you for your time, courtesy, consideration, understanding and simple respect for our community.

Staff and Board of the Central Bucks Senior Activity Center
